

**Product Code . JL-LEP-10319**

## **Human Brain Model**

### **Description**

---

#### **Specifications:**

This is used to illustrate the parts and functions of the sense organs of the human body, specifically the brain.

Life-size, made of non-toxic plastic material.

The model can be disassembled into 8 parts: 4 cerebrum parts (temporal and occipital lobes, the frontal and parietal lobes); 2 brain stem parts (right and left) and 2 cerebellum parts (right and left)

Shows Thalamus, Pituitary gland, Hypothalamus and Pons

Color markings on the brain model illustrate arteries (red) and veins (blue), cranial nerves (yellow), along with the cortex (pink) and medulla fiber (white).

As per DEPED Guidelines.
