

Description

Cat. No. : "JSS-302/021"

DESCRIPTION :-

Determine accurately the elementary charge of the electron and demonstrate quantization with this classic apparatus.

It features a whole-plate reversible polarity electrode chamber, which provides a completely uniform field, and a high intensity LED light source.

Field voltage: 0-500V; reversible polarity

Light source: 1A high intensity LED; heat-managed

1 micrometer latex, in suspension
