

## Description

---

Cat. No. : "JSS-189/027"

### DESCRIPTION :-

Vibrator, for strings, Melde's App,  
4-Sv.AC.

It is used to vibrate a length of cord horizontally (maybe 1 to 2m length) as it is pulled taut along the surface of a bench and passed over the edge of a table with a weight attached to create a known tension in the cord.

The armature (the moving part) of the vibration device has a hole in the tip for the attachment of the cord.

The kit includes a bench clamp and a pulley on a rod to guide the cord over the bench edge and to be adjusted so that the cord is parallel to the bench top.

With Resonance apparatus tube -  
aluminum AND Sound box, extra  
speaker
